-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

The request for reexamination received 2 December 2005 has been made of record. Claims 1-7 and 9-19 are pending.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Lerman et al.

This rejection is maintained for reasons of record. Applicants' process limitations in these product claims are not seen as imparting patentability to the claims since applicants have not demonstrated patentably distinct properties flowing from the process limitations.

Claims 1-5, 7, 11 and 14-19 are rejected under 35 U.S.C. 102(b) as being anticipated by WO '342.

WO '342 discloses colored fine particle resin compositions suitable for powder coating applications. These fine particles are taught as produced by a process comprising melting the colored resin followed by passing the molten resin through a nozzle and into a cooling medium. The "approximately spherical shape of the particles of the reference is seen as meeting the instant limitation to "droplet shaped" particles. (see page 4, line 6 to page 5, line 2, page 12, lines 8-22, page 13, lines 9-18 and page

22, lines 7-22). The use of polyesters and epoxies such as claimed instantly are taught at page 6.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over WO '342.

WO '342 is discussed above. This reference fails to explicitly recite applicants' claimed colorant ingredients. It is the position of the examiner that the recitation of suitable pigments on page 8 of the reference renders obvious those claimed instantly. It would have been obvious to one of ordinary skill in the art to choose pigments and combinations of pigments in order to tailor the powder coats for a particular color.

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (571) 272-1118. The examiner can normally be reached on M-F from 10:00 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan, can be reached on 571-272-1119. The fax phone
